**Dr. Bhavin Shah (M.D.)**  
Consultant Radiologist

• Plain X-rays  
• Whole Body Ultrasonography  
• Color Doppler Study  
• Guided Interventional Procedures  
• Biopsy Consultation

**Clinical Experience**  
• Nanavati Hospital (Bombay)  
• Tata Memorial Hospital (Bombay)  
• Kailash Cancer Hospital, Gorai

**PATIENT'S NAME: DINESH TAK, M/23Y**  
**DATE: 01.09.2025**

## Urinary Bladder:

It is optimally distended.

No evidence of calculus / wall thickening / floating echoes / diverticulum is seen within.

Prostate measures 27 x 25 x 31mm (CC x AP x RL) with volume 11cc.

Bilateral suprarenal regions reveal no obvious abnormality.

Bowel loops (small intestines and ascending colon, transverse colon, descending colon and sigmoid colon) reveal normal wall thickness.

RIF reveals no abnormality.

Omentum and mesentery reveal no obvious abnormality.

No evidence of mesenteric/ retroperitoneal/ periportal / peripancreatic lymphadenopathy is seen.

No evidence of free fluid is seen in peritoneal cavity.

Bilateral diaphragms reveal normal respiratory movements.

Bowel loops reveal normal peristalsis.

Retroperitoneal great vessels – naming abdominal aorta and inferior vena cava appear normal.

Anterior abdominal wall reveals no obvious abnormality.

Hernial sites (umbilical region and bilateral inguinal regions) appear normal.

Bilateral posterior paraspinous regions appear normal.

## IMPRESSION:

Mild hydronephrosis on right side along with mild ipsilateral upper and mid hydro-ureter; right distal ureter – obscured by bowel gas

USG Finding	Mild hydronephrosis on right side along with mild ipsilateral upper and mid hydro-ureter; right distal ureter – obscured by bowel gas
Suggestion	CT KUB/ CTIVP to evaluate for the possibility of right distal ureteric calculus

## Ultrasonography of abdomen & Pelvis

### HEPATO-BILIARY SYSTEM:

#### Liver:

It measures 118mm in its CC dimension. Its surface is smooth. It reveals normal homogeneous echo-pattern. No evidence of focal lesion (solid/cystic) is seen. Portal vein measures 9.4mm at porta hepatis. reveals normal hepato-petal flow. Perihepatic space appears clear.

#### Gall Bladder & Biliary System:

Is optimally distended. Its fundus, body, neck and cystic duct are well visualized. No evidence of calculus/wall thickening/ pericholecystic collection is seen. No evidence of dilatation of intrahepatic biliary radicals is seen. CBD is normal.

#### Pancreas:

It is of normal size, shape and echo-pattern. No evidence of solid/cystic lesion is seen. MPD appears normal. No evidence of Peripancreatic fluid is seen. Pancreatic tail appears normal.

#### Spleen:

It measures 116mm along its long axis. It reveals normal shape and echo-pattern. No evidence of solid/cystic lesion is seen within.

### URINARY SYSTM:

#### Right Kidney:

It measures 99mm in its CC span. Cortico-medullary differentiation appears normal. No evidence of calculus is seen. It reveals mild hydronephrosis along with mild ipsilateral upper and mid hydro-ureter. Right distal ureter is obscured by bowel gas. No evidence of solid/ cystic lesion is seen. Perinephric space appears clear.

#### Left Kidney:

It measures 107mm in its CC span. Cortico-medullary differentiation appears normal. No evidence of calculus / hydronephrosis is seen. No evidence of solid/ cystic lesion is seen. Perinephric space appears clear.

No evidence of hydro-ureter is seen on left side.  
Bilateral uretero-vesical junctions appear normal.

Dr. Bhav
