TASK-B

part A

Subject: Just checking in — How's your first week going?

Hi William

I hope you've had a great start with Recruit CRM! It's been a week since your onboarding, and I wanted to check in — is everything running smoothly, or have you hit any blockers?

Since you're working as a Junior Recruiter, here's a quick tip you might find useful: you can use our Advanced Search Filters to instantly find specific candidates or jobs without going through multiple screens. Many of our power users say it saves them hours each week.

If you'd like, I can hop on a quick call to walk you through a few hidden features that can make your workflow even faster.

Looking forward to hearing how things are going for you!

Best regards,

Dinesh

Junior Recruiter | Recruit CRM

Part B — AI Curiosity Question:

If Recruit CRM gave you an AI Buddy on your first day, what tasks would you have it handle?

Personally, I had have my AI Buddy send timely follow-up reminders, draft quick candidate emails, and auto-organize notes from interviews. It would save a lot of repetitive work and help me focus more on building relationships with candidates and clients.
